

Product Profile Sheet

DI Water Skid

Benefits:

- Facility DI Water Heating in Single System
- Ensured Purity with Filtration
- Modular System to Allow Operation During Filter Changing

For centralized DI Water heating into one system, this DI Water Skid is complete with pumps, heaters, filters, and controllers. It is completely customized to meet facility.

Designed buffer to allow for part of the system to be isolated during filter change out, this skid provides continued hot DI Water to your processes without interruption. Keeping this system up and running during required servicing is vital to keep production lines active.

DI Water Skid

Materials:	PVDF, PFA, Stainless Steel, and Chemrez [®] 505 Wetted Surfaces
Pump:	Grundfos Pumps
Heat Exchanger:	Alfa-Laval Heat Exchangers
Temp Control:	Temperature control is maintained through use of mixing valve system & PID Controller
Filters Housing:	GE Osmonics
